EPA Certification Required for Lead Paint Rule is now in effect - Register for a Course Today!!

RRP Course Dates/Locations

AVAILABLE DATES:

- Thu, August 19th
Santa Ana
- Fri, August 20th
Ontario
- Fri, September 10th
Santa Ana
- Sat, September 11th
Rancho Cucamonga
- Fri, September 17th
LA County
- Mon, October 18th
Orange County
- Tue, October 19th
Rancho Cucamonga
- Thu, October 28th
LA County
- Wed, November 3rd
Loma Linda
- Wed, November 17th
Long Beach Conv. Ctr.
- Tue, November 30th
Chatsworth

Please note: your selection must be confirmed by BIA before you are registered for a class date.

Please call 949.224.0321 for more information.

December dates will be announced soon.

If you do Renovation, Repair or Painting (RRP) in Any Pre-1978 Residential or Nonresidential Structures Where Children Could Be Present – This Certification Requirement Applies to You

The RRP Rule applies to all types of contractors who work in pre-1978 housing and/or child-occupied facilities, who disturb painted surfaces while doing plumbing, electrical, drywall, painting, flooring, window replacement, landscaping, construction, renovation, remodeling, HVAC and demolition jobs, etc. The rule applies to homes, rentals, schools, institutions, non-profits & government agencies. **This EPA Certification is mandated for all contractors. The EPA has “postponed” enforcement actions until after December 31st, as long as individuals are enrolled in a class by September 30th and complete the class by December 31st.** Contractors working without certification are subject to fines up to \$37,000 per incident. BIA has partnered with the EPA-approved educational organization HomeSafe Environmental to deliver the full-day Renovation, Repair and Painting (RRP) Course.

Course dates and city locations are listed to the left. Please indicate your preferred date and complete the registration form below. Upon registration, you will be informed of the location details within the city for the course.

Classes begin at 7:30 a.m. and conclude at 5:00 p.m. The cost is \$195 for BIA Members, \$215 for non-members per person. (Refreshments and lunch are NOT included.) The full-day RRP Training Course includes course work, hands-on practice, end-of-day exam, and certification photo ID card.

Contractors, Painters, Landlords!

**EPA's Renovation,
Repair & Painting
or "RRP" Rule
Applies to You!**

The deadline for becoming RRP Certified has been extended. To avoid penalties, enroll in an accredited RRP class by September 30, 2010.

The RRP rule requires renovation, repair and painting contractors to:

- become "RRP certified"
- use lead safe work practices when working in homes built before 1978.

The RRP rule affects contractors, property managers and others who disturb known or presumed lead-based paint during renovation activities done for compensation. This includes most repair, remodeling and maintenance jobs, such as window replacement, weatherization and demolition. Fines for violating the RRP Rule can be up to \$37,500 per incident.

Requirements for Contractors Include Certification & Training

- Firms must have one or more "Certified Renovator" assigned to jobs where lead-based paint is disturbed. To become certified, a person must successfully complete an EPA training course conducted by an EPA-accredited training provider.
- All renovation workers must be trained. They can be trained to use lead safe work practices on-the-job by a Certified Renovator if the work is not HUD regulated, or they can become Certified Renovators themselves.
- Firms performing renovation, repair or painting work must also become certified. This is in addition to individual certification and requires applying to EPA and paying a fee.
- To read more about the RRP Rule go to: <http://www.homesafetraining.com/rrp.html>

Frequent Questions on EPA's June 18, 2010 Implementation Guidance for the Renovation, Repair and Painting Rule

Q. Does EPA's announcement of June 18, 2010, modify the Lead Renovation Repair and Painting Rule's requirements that contractors use lead-safe work practices when working in pre-1978 housing or child-occupied facilities?

No. This announcement does not change the requirement that all contractors take steps to protect children and families from the dangers of lead poisoning by becoming certified and following the [work practice standards and the associated recordkeeping requirements](#). As of April 22, all contractors have been required to be certified and follow the work practice standards described on EPA's website. The effect of the June 18 memorandum only provides firms more time to apply for and obtain certification as a lead-based paint renovation firm before active enforcement of the firm certification requirements begins. EPA is also providing individual workers additional time to enroll in and take the required training course to become certified lead-based paint renovators before active enforcement of the individual renovator training requirements begins. EPA will use its enforcement authority to ensure compliance by enforcing work practice standards and their associated recordkeeping requirements against all renovators and firms. Therefore, renovators who have not been able to complete the training requirements are advised to review EPA's model training materials available at www.epa.gov/lead/pubs/training.htm. Additional information on lead-safe work practices can be found at www.epa.gov/lead or obtained from the National Lead Information Center at 1-800-424-LEAD (5323).

All renovation firms, even those not yet certified under the RRP rule, are also reminded of their continuing obligations to comply with Lead Renovation, Repair and Painting Rule's pre-renovation information distribution requirements, which require that before firms begin each renovation on pre-1978 housing or child-occupied facilities and to comply with the associated recordkeeping requirements. These requirements are explained in EPA's [Small Entity Compliance Guide to Renovate Right](#).

Q. Does the June 18, 2010, announcement mean that EPA will not enforce certification and training requirements until after October 1, 2010, for firms and December 31, 2010, for renovators?

A. EPA is not stopping its enforcement against any renovation firms and individual renovators who do not comply with requirements of work practice standards and associated recordkeeping requirements. However, EPA is providing additional time for renovation firms and workers to obtain the necessary training and certifications before enforcement of the firm certification and individual renovator requirements begins.

- **Renovation Firms.** Until October 1, 2010, EPA will not take enforcement action for violations of the RRP rule's firm certification requirement.
- **Individual Renovators.** EPA will not enforce against individual renovation workers for failure to be trained if the person has applied to enroll in, or has enrolled in, by not later than September 30, 2010, a certified renovator class to train contractors in practices necessary for compliance with the final rules. Individual renovators must complete the training by December 31, 2010. Renovators who have not been able to complete the

training requirements are advised to review EPA's model training materials available at www.epa.gov/lead/pubs/training.htm. Additional information on lead-safe work practices can be found at www.epa.gov/lead or obtained from the National Lead Information Center at 1-800-424-LEAD (5323).

Q. Thousands of renovators are already trained and their firms are EPA certified. Will EPA enforce against renovators who did not receive their training certification before December 31, 2010?

A. It is most important that all contractors follow the RRP work practice standards. However, EPA is providing additional time for renovation firms and workers to obtain the necessary training and certifications before the enforcement of the firm certification and individual renovator requirements begins. Therefore, renovators who have not been able to complete the training requirements are advised to review EPA's model training materials available at www.epa.gov/lead/pubs/training.htm. Additional information on lead-safe work practices can be found at www.epa.gov/lead or obtained from the National Lead Information Center at 1-800-424-LEAD (5323).

Q. Doesn't the June 18 memorandum extend an unfair advantage to members of the regulated community who have delayed compliance with the certification and training requirements and punish those who have complied with the rule?

A. EPA does not believe that allowing more time for firms to become certified and renovators to become trained extends an unfair advantage. To the contrary, firms that are already certified can benefit by continuing to advertise that they are certified and may continue to use EPA's program logo during this interim period. The Agency also recognizes the challenges some are facing in obtaining training in a timely fashion and is providing additional time to individual renovators to enroll in and take the required training courses before the Agency actively enforces the individual renovator requirements. EPA is committed to encouraging additional training opportunities in every state to meet this demand for classes.

Q. How does the June 18 announcement impact renovators in states that have adopted their own RRP programs?

A. As of June 21, 2010, eight states -- Wisconsin, Iowa, North Carolina, Mississippi, Kansas, Rhode Island, Utah, and Oregon -- administer and enforce their own RRP programs. Renovators working in these states must comply with all applicable state laws, notwithstanding this guidance.

Q. What happens if an individual applied or was accepted for training before October 1, 2010, but the course is cancelled or delayed by the training provider during that 90-day period (October 1 - December 31, 2010)? What recourse does the individual renovation worker have after 12/31/10?

A. The renovator must complete training by December 31, 2010. EPA encourages renovators and firms to take advantage of this opportunity and not delay in becoming trained and certified.

Q. How soon should renovation firms send their applications to EPA?

A. Firms should send their applications to EPA as soon as possible. All firms that are not certified by October 1, 2010, will be subject to penalties for failing to comply with the renovation firm requirements of the RRP rule. EPA has been working to expedite processing of applications but, under the regulations, may take up to 90 days.
